

Aidite

CL-200

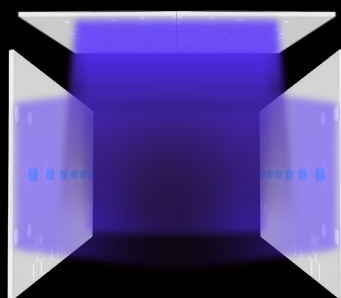

A Curing Light Box Born for Dentistry
Faster and easier to use

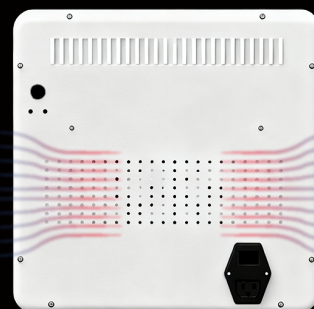

Everyone with a healthy and beautiful smile

Dual Light-Heat Curing: Adapts to All Dental Resin Scenarios

405nm UV + heating dual mode, fits all dental resins, compensates curing depth and boosts restoration strength & adaptability.

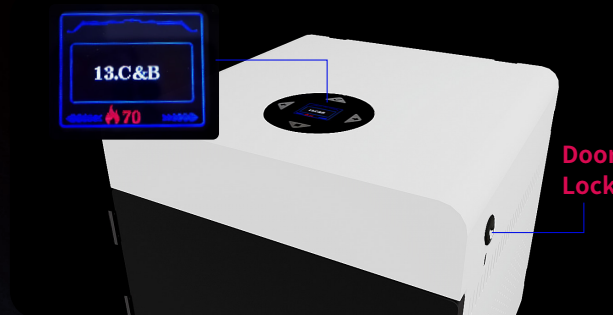

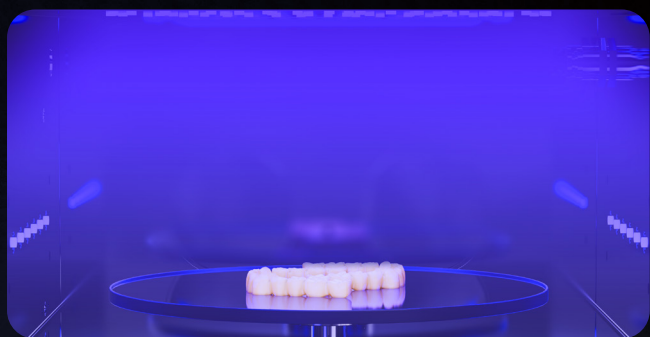

405nm UV

HEAT

23 Smart Programs: Ready-to-Use for Dental Procedures

13 preset dental programs (one-click use) + 10 custom programs, cuts batch setup time and boosts efficiency by 50%.

85% Full-Area Light Uniformity: Strictly Controls Dental Restoration Precision

LED matrix ensures 85% full-area light/temperature uniformity ($\leq 5\%$ deviation), cures restorations in one batch and cuts rework rate by 90%.

Door Lock When Temperature Exceeds 68°C: Avoids the risk of burns

Door locks at $>68^{\circ}\text{C}$ chamber temperature, which avoids the risk of burns and meets dental safety standards.
